Sharper Image TV Wireless Headphones PARTS IDENTIFICATION TRANSMITTER BASE A. Charging pointB. Power buttonC. Signal indicator lightD. Volume -G. Audio in jack Sharper Image TV Wireless Headphones PARTS IDENTIFICATION TV WIRELESS HEADPHONES SET-UP Plug the included AC adapter into the DC 5V jack in the back of transmitter base. Then, plug the other end into an AC outlet. Slide the Audio Signal switch on the back of the transmitter base to the ON position. If the blue power (lower) light illuminates, the unit is receiving power. NOTE: This device must be used with the AC adapter supplied in the package. If your AC adapter is lost or damaged, please contact Sharper Image Customer Service. Do not use any other AC adapters or power cords. For optimum performance, the TV Wireless Headphones must be fully charged before the first use. This can take 5 hours. Make sure the transmitter base is plugged in as described above. Slide the Audio Signal switch on the back of the transmitter base to the OFF position. Turn off the power on the TV Wireless Headphones are charging. The power light on the transmitter base will turn RED while the headphones are fully charged or in use. Store your TV Wireless Headphones on the base when not in use. NOTE: There are two LED lights on the front of the transmitter base: Audio Indicator Light (upper) and Power Light (lower). CONNECTING YOUR TV The TV Wireless Headphones can be connected to the TV three different ways: Headphone Jack — Use the included 3.5mm audio cable. Plug one end into the TV headphone jack. Plug the other end into the Audio Out jacks on the back of the transmitter base. Audio Out - Check to see if your TV has red and white Audio Out jacks on your TV. Then connect the included 3.5mm cable to the adapter, and plug the other end of the 3.5mm cable into the Audio In jack on the back of the transmitter base. Digital Optical Cable — Many new TVs do not have a headphone jack or Audio Out jacks. If this is the case, you must use the optical output on your TV. This jack is also called "optical audio," "TOSLINK" or "Digital Audio Out (Optical)." Plug the included fiber optic cable into this jack on your NOTE: Please be sure to check the shape of the Digital Optical Cable before you plug it in. The shape of the cable must align with the shape of the jack. Please be sure to remove the clear caps on both ends of the Digital Optical Cable before use. Please be sure to remove the clear caps on both ends of the Digital Optical Cable before use. Digital Optical Cable, or it will default to the Audio Out Mode. 2. When the transmitter base is connected to the TV, turn on the power on both the transmitter base will turn BLUE. NOTE: Make sure your TV is not on mute. Press the Power button on the right side of the headphones. The indicator light will turn GREEN when successfully connected. The headphones will automatically connect within 5 seconds. Please the headphones on your head. Adjust the volume using the Vol+ and Vol-buttons on the left side of the headphones. You should now be able to hear your TV through the headphones. Sharper Image TV Wireless Headphones USING THE TV WIRELESS HEADPHONES NOTE: If you want to connect more than 1 pair of headphones in a space on different transmitters to avoid interference. Select channel 1, 2, or 3 by sliding the Power button on the base, then you can select to connect the headphones in a space on different transmitters to avoid interference. by pressing the SCAN button on the left side of the headphones. Each transmitter can connect more than 1 pair of headphones at the same time with the headphones to the charging base in order to recharge. Your TV Wireless Headphones can also be used as wired headphones, for use outdoors or on a plane (with a smartphone, tablet, laptop, MP3 player, etc.). For wired use, connect the included 3.5mm audio cable to the Audio In jack on the headphones. Plug the other end into your mobile device. To conserve battery power, be sure headphones are powered off when using them as wired headphones. TV Wireless Headphones will not pick up wireless audio signals while the audio cable is plugged into the Audio In jack. When you want to watch TV again, make sure you unplug the 3.5mm audio cable. SYSTEM RESET In the rare event of a malfunction, you may need to perform a system reset. Turn on the power of the transmitter base. Turn on the power of the headphones at the same time. The signal indicator lights will begin to flash blue. When you hear a long beep sound, let go of both buttons. The system has now been reset. FCC COMPLIANCE This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: This device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. TROUBLESHOOTING ProblemPossible SolutionNo sound coming from Headphones. • Ensure the AC adaptor is properly plugged into the Transmitter Base and a working AC outlet. • Ensure the Headphones are charged and powered ON. Increase the Headphone volume. Ensure that you are in range. The wireless range is about 160 ft. but may be less if there are walls or doors between you and the transmitter base. Ensure that the TV is on and that the volume is turned up (not muted). audio cable or optical cable at one time, or it will default 3.5mm audio priority if both plugged in.Important: On some newer TV sets, it may be necessary to turn on or increase the output level of the headphone jack or the Audio Out jacks. Normally, you can check this bypressing the Menu button on your TV remote control and entering the Settings or Set Up menu. Consult your TV owner's manual for detailsSound is distorted, staticky or hissy. • Ensure the volume level of the headphones are too far from the transmitter base. Move them closer. • The audio signal input level is too high or low. Adjust the volume of the TV.Important: On some newer TV sets, it may be necessary to turn on or increase the output level of the headphone jack or the Audio Out jacks.
